EXPERIENCE

Advika Innovate

June 2025 – Present

Frontend Developer

- Built the user interface for the Nexamaze e-commerce platform using **React** and Material-UI, streamlining the customer journey.
- Developed responsive, interactive components to ensure seamless cross-device navigation and improve the shopping experience.
- Improved data integrity and reduced user errors by implementing robust form validation using **React Hook Form**.
- Collaborated with cross-functional teams to deliver scalable frontend architecture for complex e-commerce workflows.

PixelSaffron

Aug. 2018 – Sept. 2019

Software Engineer

- Delivered tailored frontend solutions for diverse client projects using **React, Next.js, and Vue.js**.
- Boosted site performance by building optimized, cross-browser compatible landing pages and marketing websites.
- Adapted to multiple **JavaScript frameworks** to successfully launch scalable, modern web applications.

PROJECTS

GoTruks (UBL)

Developed dynamic user interfaces for a comprehensive smart truck booking and logistics platform operating in the Middle East.

Engineered responsive, role-based portals for Shippers and Transporters, integrating multi-step booking workflows and real-time shipment tracking dashboards.

DealAmaze

Built and maintained the frontend architecture for an expansive e-commerce marketplace featuring diverse product categories.

Implemented high-performance product listing grids, dynamic filtering mechanisms, and an interactive "Deals of the Day" countdown timer to drive conversions.

Engineered efficient state management logic to seamlessly handle complex user cart operations, wishlists, and checkout processes.

Interactive Particle Image Hover Library | *JavaScript, Canvas API*

- Built a lightweight JS library for particle-based image hover effects using `<canvas>` | .
- Enabled hover, click, and vortex interactions with customizable particle physics.
